SOLAR FARM AND BATTERY

Fulham Solar Farm and Battery project Construction Update - October 2025

The Fulham Solar Farm and Battery project is a 80 MW (megawatt) renewable energy development with DC-coupled battery storage of up to 128 MW hours. The project will generate enough energy to power around 39,000 homes once operational.

Works are underway

Construction is progressing smoothly. Works completed to date include:

- initial stages of constructing the internal roads
- removing the old house
- completing the Switching Station bench, in preparation for AusNet to start their works
- establishment of the main contractor compound
- maintaining the site such as grass slashing.

Upcoming works include:

- completing the final layer for the internal roads
- piling works.

Deliveries to site are forecast to increase, we expect roughly 45 trucks moving to and from site each day.

What to expect

As we conduct these works, you may notice the following:

- **Noise and dust** – There may be varying levels during work hours. We will monitor and manage both in line with environmental guidelines.
- **Vehicle movements** – Until the internal road is complete; deliveries of materials and equipment will continue to enter the site via Hopkins Road and then McLaren's Road to minimise disruption.
- **Site compound activity** – Construction traffic will enter and exit the site compound from Hopkins Road.
- **Planned utility service outages** – If any temporary outages are required, further information will be provided to the affected residents prior to the works.

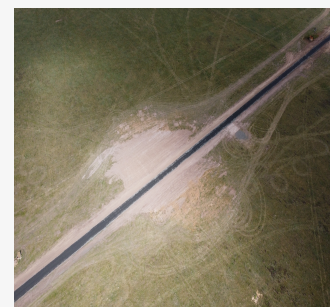

Construction hours

7am to 5pm, Monday to Friday
7am to 1pm, Saturday

Please note vehicle movements to and from site may occur either side of these working hours to allow for return travel.

Main contractor compound.

Access and internal roads.

Community

The project team will be holding **“Pathways on Project”** community information sessions, providing an opportunity for local residents to learn more about the project, explore the employment opportunities it offers and find out how to access them.

Wednesday, October 22nd:

- 7:30 AM to 11 AM at Sale Pedestrian Mall (near Sale Clocktower, Raymond Street).
- 3 PM to 5:30 PM at the lawn of St Columbas Church, Sale.

Thursday, October 23rd:

- 7:30 AM to 11 AM at Prince Street Reserve, Rosedale.

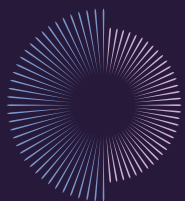

Employment

With the civil subcontractor now onsite, approximately 50 personnel are currently working on the project, with numbers expected to continue increasing over the coming months.

We are committed to supporting skills development and careers in renewable energy. During construction, at least 10% of all labour on the project will be delivered by apprentices, cadets and trainees.

We remain focused on engaging local workers wherever possible. Upcoming roles will be advertised through (but not limited to):

- Workforce Australia website
- Gippsland Jobs Hub
- Central Gippsland Aboriginal Community Information Facebook page
- Seek and LinkedIn.
